

BCTI

Biblical Counseling Training Institute, Inc.

Jesus . . . the Ultimate Healer

Would you want to
worship in the
open, exposed to
monsoon like rain
and unrelenting 105
degree heat? Week
after week?

We can help the **Oasis Worship Centre** congregation in the Rakai region of Uganda by being their partners in building a Pole Barn like facility so they can worship together on a weekly basis without being interrupted by monsoon like rains.

And they can have room to teach their youth in a safe setting.

This facility will have a metal roof and brick sides, something like the model here but with brick siding, which is less costly to build because members of the congregation are making the brick (30,00) and build the walls with them.

The building will be 32' x 50' with walls of brick made by the congregation themselves.

The Oasis Worship Centre church was started by Rev. Emmanuel Kabambi, a graduate of BCTI (Biblical Counseling Training Institute), serving as a Biblical Counselor and church planter in the Rakai region of Uganda and the church has been meeting out in the open.

'Emmy' teaches from the Reformed perspective and encounters much opposition, mainly from the Muslim community.

Rev. Kabamba has asked us to help him in getting a worship building for this congregation which consists of approximately 42 families, with children included it amounts to about 130 people and growing fast.

The congregation has pledged to furnish all the labor in putting up the pole barn, cement footings, cement floor and the making of the bricks, in addition to building the brick walls. There are some bricklayers in the congregation and a plot of land has been donated. But they need help in buying the raw materials.

The building plans call for a structure of 32' x 50', basically a pole barn with corrugated steel roofing and brick siding. With the congregation furnishing the bricks, and labor for building the pole structure, bricking the walls, pouring footings and floor,

The budget is as follows:	Total cost
250 Poles	\$ 2500
200 Corrugated steel roofing sheets	\$ 10000
600 lbs. of nails	\$ 2500
10 loads of gravel for mixing with sand	\$ 2000
10 loads of sand	\$ 1000
40 bags of cement	\$1250
20 Ridges	\$ 750
Total Cost	\$ 20000

The church members of Oasis Worship Centre have expressed a desire to communicate with potential donors via letters, pictures, videos, showing progress being made in the building process and to establish a relationship with brothers/sisters in Christ in other places of the world. They live in a remote area of Uganda and are eager to grow in Christ and learn from more mature Christians.

If you desire to participate in this aspect of the ministry, please let us know and we will assign a brother/sister in Christ to you. We pray the Holy Spirit moves your heart to donate the cost of some building items listed above.

You can donate by check, send it to: BCTI, 701 S. Mock St. K2, Prairie Grove, AR 72753 or you can donate online at www.bcti.bible and designate: Oasis Worship Centre.

Your donation is tax deductible. BCTI is a tax-exempt IRS 501 (c) 3 non-profit ministry.

In Christ,

Paul Tameling, SSG
